

Smart IT Odoo  
ERP Academy

## Specialist training focused on the implementation, use and maintenance of Odoo ERP in a commercial environment.

As a company, we continually ask ourselves how can we internally develop talent and how can we transform existing staff members into differentiating ERP roles? Our response to a national skills shortage is the Smart IT Odoo ERP Academy.

Are you looking to pursue an extremely rewarding career? Are you looking to join a company that will support you on a career pathway that can see you earning £50,000+ as a functional ERP consultant? Developing your skills to make a real difference in the design and delivery of ERP using a disruptive platform, Odoo.

# What is ERP?

Enterprise resource planning (ERP) is a type of software that organisations use to manage day-to-day business activities such as accounting, procurement, sales, customer services, project management, risk management, manufacturing and compliance, and supply chain operations. ERP systems bring together a multitude of business processes and enable the flow of data between them. By collecting an organisation's shared transactional data from multiple sources, ERP systems eliminate data duplication and provide data integrity.

ERP systems are critical for managing thousands of businesses of all sizes and across all industries.

## About Odoo

Odoo's integrated software technology is a highly affordable business productivity solution for any industry sector: it can transform processes, efficiency and capabilities for mid-sized and enterprise organisations with ambitious growth plans.

With millions of worldwide users and proven returns on investment, Odoo is modular by design and easy to use. It is now recognised as a global best seller and an essential functionality tool for business success.

# The curriculum

The curriculum covers all operational aspects of Odoo from installation through configuration to practical operation in a business environment.

Digital by design, the Smart IT Odoo ERP Academy programme pathways have the flexibility to meet the learners' individual needs but also ensure progress is maintained and to keep candidates on track. The pathways provide an immersive learning experience with online modular learning resources for candidates to discover in their own time. Mentoring forms a key part of the programmes. Learning is consolidated with a formal examination at the end of each course.

This programme enables Smart IT to offer employment to a wider, less experienced community whilst offering them the opportunity for a progressive career in the ERP sector.

The career path sees candidates serve periods in the following roles:

- Help Desk Assistant
- Help Desk Customer Representative
- Junior Functional Consultant
- Functional Consultant
- Senior Functional Consultant

Thereafter, they may elect to continue as a functional consultant or, alternatively, move into a project management or sales position.

## Why work for Smart IT

Smart IT is one of the leading Gold partners for Odoo in Europe and the fastest growing in Canada

Our staff includes senior consultants, software engineers, project managers, and support technicians with an average of ten years' experience.

If you are looking for a career that will always inspire, develop and challenge you then you will love being part of our team.

We are always looking for talented people and we can offer you plenty of variety and development, as well as the chance to get involved with ambitious growth project.

Are you ready for the challenge?

- Competitive salary and benefits
- Project profit-based incentive scheme
- Great training
- Mentoring scheme

# Who can apply?

Open to everybody, from school leavers to adult learners. The Academy training is designed to meet the demand for skilled Odoo ERP practitioners. You do not need to hold a degree to apply. However, we recommend good A levels or equivalent and excellent interpersonal skills.

# How to apply

The programme is open to applications now. UK residents only.
