

Upskill your team  
with the Smart IT  
Odoo ERP  
Academy

## Specialist training focused on the implementation, use and maintenance of Odoo ERP in a commercial environment.

As a company, we continually ask ourselves how can we internally develop talent and how can we transform existing staff members into differentiating ERP roles. Our response to a national skills shortage is the Smart IT Odoo ERP Academy.

We have now extended this to our clients and other Odoo users who require training. We have training programmes for all modules and all levels of users from beginners to experts requiring help on specialist customisation development.

**Develop your skills with Smart IT to make a real difference in the design and delivery of ERP using the disruptive platform, Odoo.**

# The curriculum

The curriculum covers all operational aspects of Odoo from installation through configuration to practical operation in a business environment.

Digital by design, the Smart IT Odoo ERP Academy programme pathways have the flexibility to meet the learner's individual needs but also ensure progress is maintained and to keep candidates on track. The pathways provide an immersive learning experience with online modular learning resources for candidates to discover in their own time. Mentoring forms a key part of the programmes. Learning is consolidated with a formal examination at the end of each course.

The training caters for all levels of candidate from beginner to expert.

We have included a sample training video for one of the CRM modules with this brochure.

Digital by design, the Smart IT Odoo ERP Academy programme pathways have the flexibility to meet the learner's individual needs but also ensure progress is maintained and to keep candidates on track.

## Why train with Smart IT
